

CLIENT PROFILE

My client is a hip hop star. He likes many things. He likes 4 things of interest. **First, he likes dancing.** He dances in front of a lot of people in public places almost everyday. He is a good hip hop dancer. He is a famous person in America. **Second, he likes to be a shining person.** Now, he is a shining person in America but he isn't like the person around the world. **Third he likes golden things** because if he has these item, he can be a shining person, So everyday, he has golden person. **Last, he likes to play sports,** for example, tennis, basketball, and soccer, He likes to play musical instruments too. He has hobby. His hobby is to travel around the world. He usually travels around the world. So, he dances in public places around the world. When he dances there, he wants to be a shining But he doesn't have any items which are source of light. So he asked me to make a product which is a unique source of light. He wanted to be a famous hip hop star around the world. He wants to use the product everytime, and everywhere.

PRODUCT DESCRIPTION

The product's shape is **hooded coat**. My client wants to use the product every time and everywhere. Clothes are warm everytime and everywhere, So the product is good for my client. The hooded coat's size is a little bigger than size of my client. My client usually dances. If the size of hooded coat is smaller than the size of my client; he can't dance well. So the size of hooded coat is a little bigger than size of my client. The product has one main function. **The function is shining in dark place.** The product has special material. So, when he goes to dark place, the product shines automatic by special material. **The product has many small lights,** so he can shine it on yours, He can change the color of lights. The heat of lights makes us warm. The product's base color is black. But the lights have many color. when he isn't using it, he can put in a closet. The product is powered by solar power. The product has cloth-like solar panel on shoulder.

Buttons

There is the mark of my client on every Buttons.

Buttons.

Color is gold.
The mark is drawn red.

Solar Panel

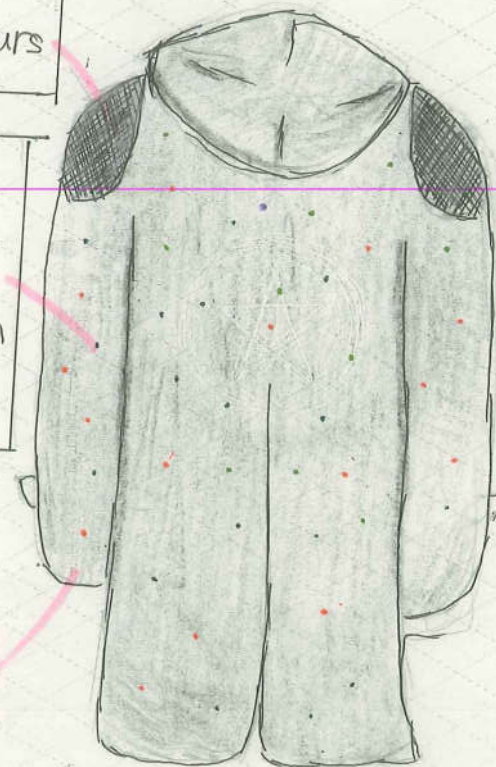

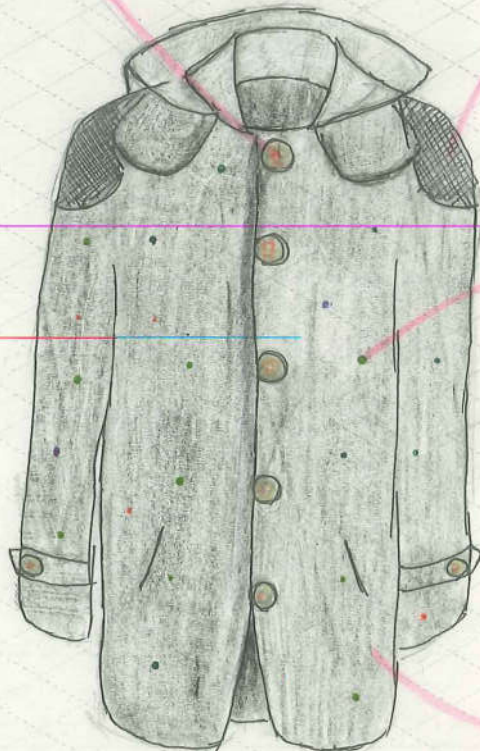

It's to make the power of lights. It isn't hard. It's very soft like clothes. It also light. Its weight is about only 100g in a product So It is not difficult to wear. It can make much power of lights. If we charge energy for one hour, we can use lights for three hours

Lights

It makes my client cool. My client wants to be a shining person. So I put a lot of lights. Lights are shined many colors. For example, red, blue, yellow, green, gold and silver. we can choose the color **Light is very small, so** it isn't noticeable.

Clothes

It has two good points. First, it is light. It looks like heavy, but it is light. So, when we play sports, we can do it with the coat. Second, it is through the window very much So we won't felt "hot". So it is good.
