

Client Profile

◊ Bad engineer.

◊ called "Cucumber"

But It's his pseudonym.

- Hacking state secret
- Doing strategy meeting with other hackers.
- Attacking important sights around the world with missile.

to use real name is dangerous for his strategy.

(of course, he didn't tell me that either.)

Through the interview <sup>with</sup> to him, I noticed he doesn't have any "families". And I noticed the reason in same moment.

He is so ugly. He looks like Cucumber. of course, he didn't marry, and noone who can take care of him is around him.

What does that means?

Yes, his life cycle is getting nose and nose.

For example, getting meal, keeping body clear etc...

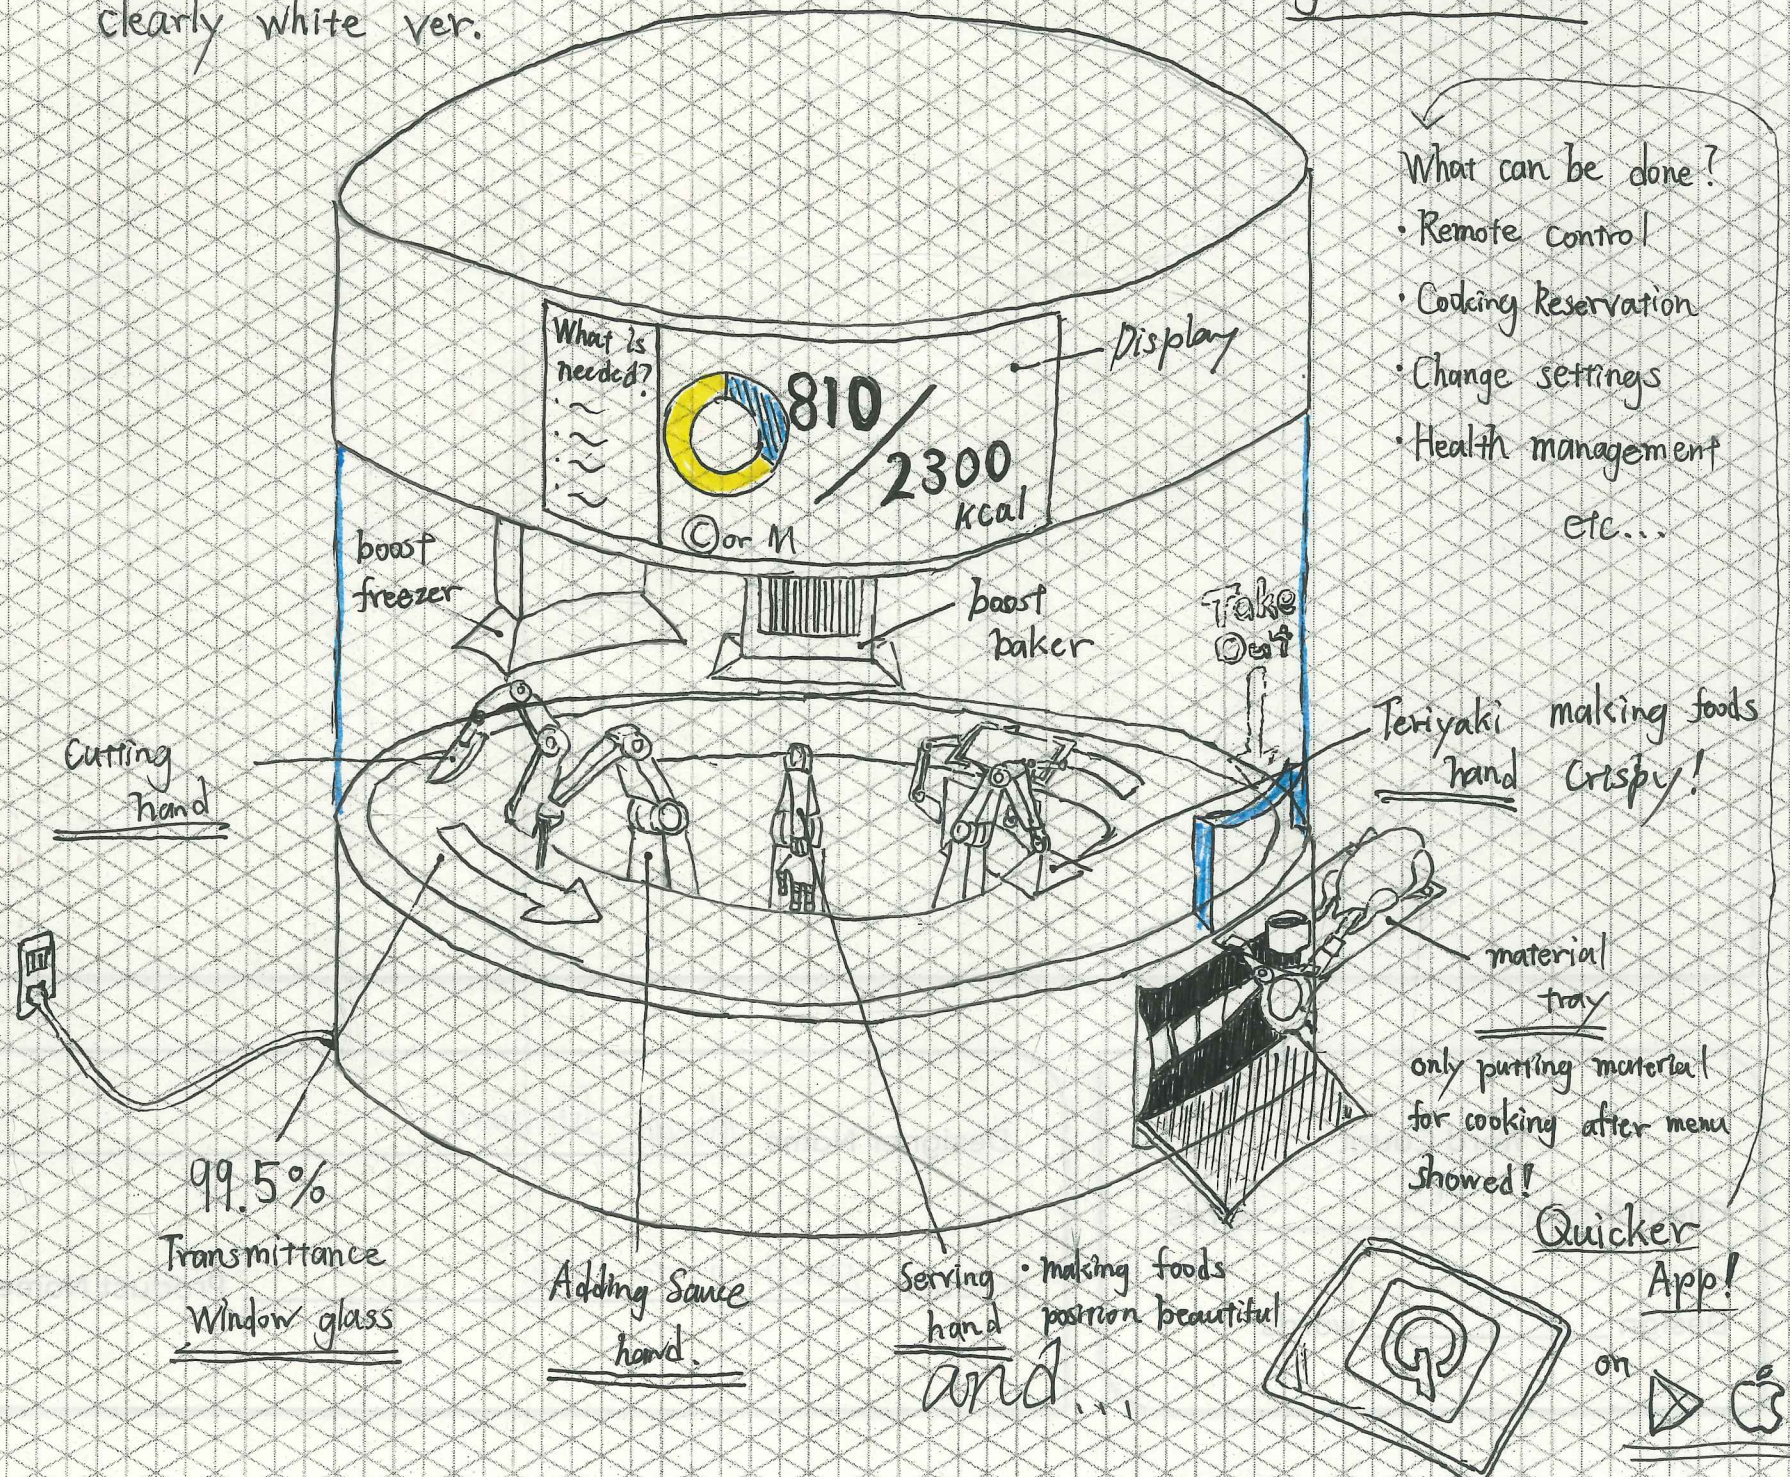

Today I focus on his life cycle of getting meal.
