

Client Profile

My client is a future child. His name is Sam. He likes red. He is only 10 years old. So he can't use complex machine. There is a special machine which can go to the past in the future. So he tries to come "now" from future to use it. He has to fight with a bad person to save future and he needs some information about them. Therefore I want to give him a communication device to get information from future. He drinks milk every morning. He trains his body for two hours every day. He wants to be tall and strong to win bad person. He has a special blue box to go to the past. If he put the box into the special machine, he can go to the past. He is very weak because he is a child, so I think he needs some weapon to fight with bad person.

This "ears phone" is red. Red looks strong and he likes red. So it's good for him. And a part of black is discreet because black is similar to his hair color.

Part of red is made from plastic. Plastic is very light and hard so it's good for him to wear. Especially, a part of black is made from silicon. It is so soft that he will not feel bad.

This is moved by a battery. It will use about for a year. You have to change battery about once a year, but we can use this "ears phone" for a long time. So it's eco.

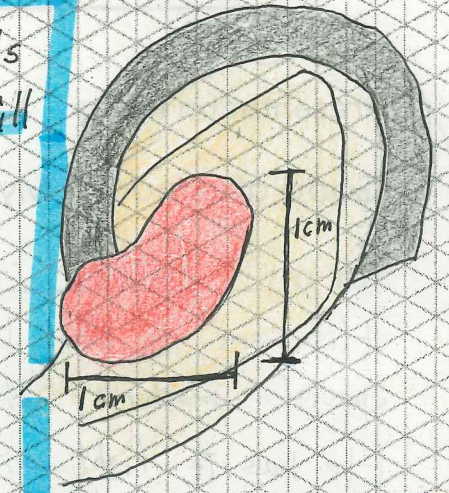

Ears Phone

And if he wears this "ears phone", his ears will become better.

So if enemy come around him, this ears phone tells him that.

As he can escape from enemy quickly.

This ears phone can become alarm, too. If he sleeps with this ears phone, he can get up easily by its sound and shaking.

He has to fight with bad person and he needs some information about them. So if he wears this ears phone, he can get information from future.

Future child wears this "ears phone" in his ears and it's very small.

If he touch part of black, it moves. And it will be light. It is useful when he is in dark area.
